

For you, from us, together

Improve your production processes and meet regulatory requirements in the chemical, biochemical, petrochemical, pharmaceutical, gas, plastics, food, sugar, pulp manufacturing and other industries.

Take advantage of our cooperations, knowledge and experience with successful companies, renowned universities, research experts and committed stakeholders.

Competence Center CHASE GmbH

Hafenstraße 47–51
Bauteil B, 3. Stock, Top B3.1
4020 Linz, Austria

Enabling the Chemical
Process Industry
to become
more energy-efficient,
more resource-saving
and more sustainable

Sustainability through Digitalization for the Chemical Process Industry

CHASE is a European Research and Technology Organisation for Chemical Systems Engineering with headquarters in Austria.

We enable companies in the process industry to make their production more energy-efficient, more resource-saving and more sustainable by virtualizing, intensifying and transforming their processes according to the principles of circular economy.

PROCESS DIGITALIZATION

Area 1: Polymer technologies and engineering to optimize processes, productivity and sustainability.

PROCESS INTENSIFICATION

Area 2: Intensifying (bio-)chemical production to improve process stability, efficiency, design and control.

CIRCULAR PROCESSING

Area 3: Transforming linear processes into circular for sustainable material and process flows and building reuseable solutions for recycling.

Benefit from key research and key technologies - in any case, in every phase, at your pace.

CHASE US:
